ELECTRICITY COST

COST OF SOLAR

Aadhav Solar Energy Pvt. Ltd.

Aadhav Solar Energy is committed to serve with its approach to renewable energy generation – smart, sustainable, reliable and efficient.

Aadhav Solar Energy Pvt. Ltd. is known for handling high quality solar rooftop systems to meet the needs of everyone, at affordable costs.

Whenever the cost of electricity goes up, a person's disposable income goes down, and now is the time to take back control of your energy demands. People want a working solution for their increasing energy bills. The answer to this issue is to get a solar PV system installed for your residence or business. Do contact us, if you are seeking a solution to your expensive electricity bills.

VISION

To Create one of the best Energy Solution company to cater the needs of the domestic, commercial, industrial and infrastructural demand with efficient and cost effective raw material without compromising the Quality and durability and ethical standards.

To grow with the continuous energy requirements with unparalleled innovation on Singular and Hybrid power solutions.

OUR SERVICES

We take the end-to-end responsibility of implementation of the solar rooftop projects from the initiation (design) stage to installation. We also offer our customers custom designed solar systems to suit their special requirements of aesthetic design. Special requirements could be solar canopies on roofs (elevated structures), covered parking spaces, covered walkways, solar covered terrace gardens and much more. Depending on the customer requirements, we can design and install both grid tied as well as stand-alone systems.

WHY SOLAR?

- Best Solution to rising electricity costs Year-on-Year.
- Accelerated Depreciation @40% for commercial installations u/s 32 of IT Act
- Though initial investments are high, the Return on Investment (ROI) is 4-5 years (max.). Thereafter, savings in Electricity Bill for the next 20 years.
- After the initial cost of installing solar infrastructure in your home or workplace, you have zero recurring costs on solar power supply.
- It's environmentally sustainable: Let's face it, we are using coal and other fossil fuels much faster than it can renew itself. As a result, the world is running out of non-renewable resources. The sun, on the other hand, shines everyday.
- Solar Modules come with a performance warranty of 25 years, which means your risks/apprehensions can be laid to rest.
- SAVE THE POLAR! GO SOLAR!**
Let's do our bit for our environment in a smart manner!!
